

# DCR3370M65

# **Phase Control Thyristor**

Replaces DS6389-1 DS6389-2 March 2022 (LN41626)

### **FEATURES**

- Double Side Cooling
- High Surge Capability

### **APPLICATIONS**

- Bridge Rectifiers
- High Power Drives
- High Voltage Power Supplies
- Static Switches

### **VOLTAGE RATINGS**

| Part and<br>Ordering<br>Number          | Repetitive Peak Voltages VDRM and VRRM (V) | Conditions   |
|---|--|--|

### **KEY PARAMETERS**

| $\mathbf{V}_{DRM}$ | 6500V    |
|--------------------|----------|
| I <sub>T(AV)</sub> | 3370A    |
| Ітѕм               | 41500A   |
| dV/dt*             | 2000V/μs |
| dl/dt              | 500A/μs  |

<sup>\*</sup> Higher dV/dt selections are available on request

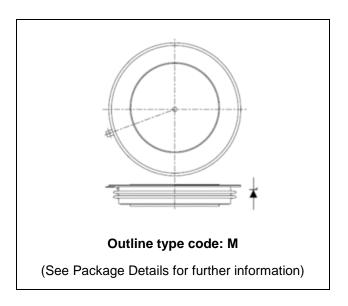

Fig. 1 Package outline

## **ORDERING INFORMATION**

When ordering, select the required part number shown in the Voltage Ratings selection table.

For example:

### DCR3370M65

Note: Please use the complete part number when ordering and quote this number in any future correspondence relating to your order.

www.dynexsemi.com 1/10

### **GATE TRIGGER CHARACTERISTICS AND RATINGS**

| Symbol      | Parameter                | Test Conditions            | Max. | Units |
|-------------|--------------------------|----------------------------|------|-------|
| <b>V</b> GT | Gate trigger voltage     | VDRM = 5V, Tcase = 25°C    | 1.5  | V     |
| <b>V</b> GD | Gate non-trigger voltage | At 50% VDRM, Tcase = 125°C | 0.4  | V     |
| Ідт         | Gate trigger current     | VDRM = 5V, Tcase = 25°C    | 400  | mA    |
| Igp         | Gate non-trigger current | At 50% VDRM, Tcase = 125°C | 10   | mA    |

## **CURVES**

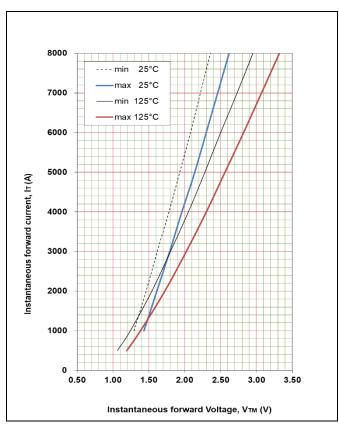

Fig. 2 Maximum & minimum on-state characteristics

# **VTM EQUATION**

 $V_{TM} = A + B.ln(I_T) + C.I_T + D.\sqrt{I_T}$ 

Where A = 1.149389

B = -0.068676

C = 0.000153

D = 0.017481

These values are valid for  $T_j = 125^{\circ}C$  for  $I_{T}$  500A to 9000A

#### IMPORTANT INFORMATION:

This publication is provided for information only and not for resale.

The products and information in this publication are intended for use by appropriately trained technical personnel.

Due to the diversity of product applications, the information contained herein is provided as a general guide only and does not constitute any guarantee of suitability for use in a specific application. The user must evaluate the suitability of the product and the completeness of the product data for the application. The user is responsible for product selection and ensuring all safety and any warning requirements are met. Should additional product information be needed please contact Customer Service.

Although we have endeavoured to carefully compile the information in this publication it may contain inaccuracies or typographical errors. The information is provided without any warranty or guarantee of any kind.

This publication is an uncontrolled document and is subject to change without notice. When referring to it please ensure that it is the most up to date version and has not been superseded.

The products are not intended for use in applications where a failure or malfunction may cause loss of life, injury or damage to property. The user must ensure that appropriate safety precautions are taken to prevent or mitigate the consequences of a product failure or malfunction.

The products must not be touched when operating because there is a danger of electrocution or severe burning. Always use protective safety equipment such as appropriate shields for the product and wear safety glasses. Even when disconnected any electric charge remaining in the product must be discharged and allowed to cool before safe handling using protective gloves.

Extended exposure to conditions outside the product ratings may affect reliability leading to premature product failure. Use outside the product ratings is likely to cause permanent damage to the product. In extreme conditions, as with all semiconductors, this may include potentially hazardous rupture, a large current to flow or high voltage arcing, resulting in fire or explosion. Appropriate application design and safety precautions should always be followed to protect persons and property.

#### **Product Status & Product Ordering:**

We annotate datasheets in the top right hand corner of the front page, to indicate product status if it is not yet fully approved for production. The annotations are as follows:

**Target Information:** This is the most tentative form of information and represents a very preliminary specification.

No actual design work on the product has been started.

Provisional Information: Some initial development work has been performed. The datasheet represents a view of the

end product based on very limited information. Certain details will change.

**Preliminary Information:** The product design is complete and final characterisation for volume production is in progress.

The datasheet represents the product as it is now understood but details may change.

No Annotation: The product has been approved for production and unless otherwise notified by Dynex any

product ordered will be supplied to the current version of the data sheet prevailing at the

time of our order acknowledgement.

All products and materials are sold and services provided subject to Dynex's conditions of sale, which are available on request.

Any brand names and product names used in this publication are trademarks, registered trademarks or trade names of their respective owners.
